Revitalize the Vision

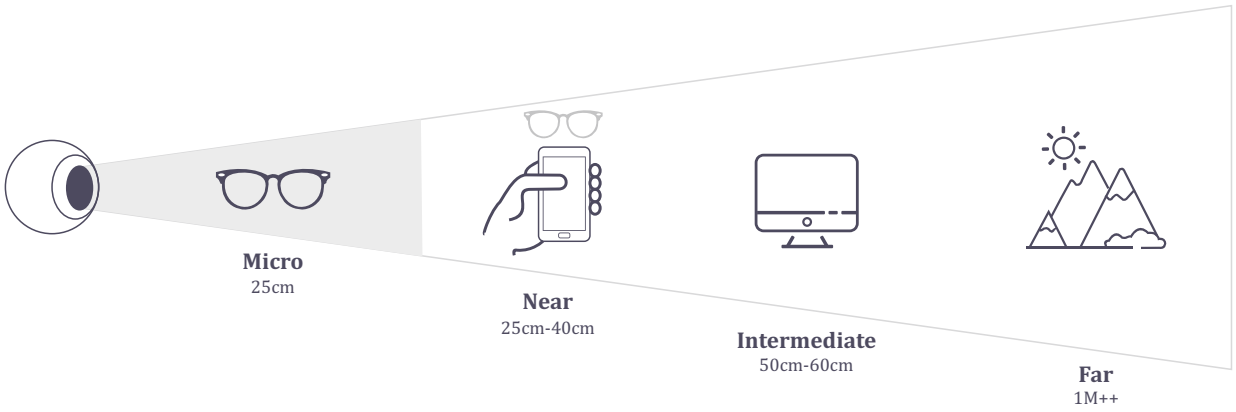

CLARITY SIMPLIFIED

EDOVue

Extended Depth of Focus IOL

- OMNI EDOVue is based on hybrid refractive platform which provides continuous range of vision from distance to near seamlessly.
- The elongated focus which is induced from the center to 1.5mm gives an enhanced intermediate vision as well as functional near vision while minimally affecting the distant vision. Moreover, it eliminates over lapping of the near and far images caused by traditional multifocal lenses and thus eliminates the "HALO" effect.
- Made using one of the world's most premium Natural Yellow co-polymer (HEMA+EOEMA) acrylic material, import from Benz Research & Development, USA.
